Skorpion

Auto Darkening
Welding/Grinding Helmet

AUTO DARKENING WELDING/GRINDING HELMET

The Skorpion helmet is equipped with 4 independent arc sensors for perfect detection of the welding arc. Equipped with the adjustment of the welding shade from DIN 9 to DIN 13, the adjustment of the sensitivity of the 4 sensors, and the adjustment of the return time to the clear shade, the Skorpion helmet is suitable for MMA/electrode, MIG/MAG and TIG welding. The grinding mode allows the cell to be locked in clear shade DIN 4. Equipped with True Colors technology for perfect vision of colours and contrasts, the automatic filter also has excellent optical qualities. The Skorpion ADF is covered by a 3-year warranty.

KEY FEATURES

- 4 arc sensors
- True colour technology
- External grind mode
- Variable shade ADF 4-9/13 with external control
- Sensitivity adjustment - continuous
- Delay 0.1 to 0.95
- 96 x 39mm viewing area
- Switching speed: 0.3ms
- Weight: 485g
- Solar power supply
- Conforms to EN175:1997, EN166:2001 & EN ISO 16321-2:2021
- 3 year warranty on ADF
